

VARIETIES OF LIFE

Under-rail

BED LINER

Tough with great protection

- Made of premium grade High-Density-Polyethylene (HDPE); robust yet flexible. It doesn't chip or crack
- Provides the highest level of protection for your valued truck bed
- Light weight and durable; withstands excessive forces and is scratchproof
- Very durable with UV protective agent blended in with the material
- The tailgate area is rubber sealed to reduce friction between the bed and the door, and also protects against rust
- Innovatively designed for a perfect fit for all pickup truck models
- Patented Aeroklas installation system; no drilling required
- Certified high quality by the Thailand Automotive Institute
- Environmentally friendly material, guaranteed by the Green Label Thailand

CANOPY

The world's only ABS double shell canopy

- Double Protection for Double Confidence
- Acrylonitrile-Butadiene-Styrene (ABS) inner and outer shells are extremely light-weight, solid, strong and remain rust-free throughout its lifetime
- High quality engineered material is used for the inner and outer shells for high impact resistance
- Widely used materials also by the Automotive industry and Aircraft industry
- Able to be reshaped after deforming impacts
- Improved NVH: no skin to metal structure movement
- No sharp edges on after impacts and no cracks
- Luxury interior look with ABS texture
- 100% recyclable and environmental friendly
- Certified high standard by TUV Germany
- Approved by various OEMs globally

1. Slide front window
2. Rear window with/and without defroster
3. SUV roof-rail
4. Handle lock and keys
5. LED brake light, built into roof
6. C-clamp
7. Dome light with limit switch
8. ABS inner shell
9. Certified by TUV Germany

DECK COVER

Stylish and practical, yet super light!

GALAXY

- Made from engineered polymer. PC-ABS, the same material used in the aerospace industry
- Comes with AeroKlas Sport Bar, made of high-quality-stainless steel
- Sporty design with a two-piece cover, front panel and body with 45 degree lifting angle
- Strong and secure lock technique
- Weather resistant with high-quality rubber seals to protect your belongings
- Improve fuel mileage, low profile, aero-dynamic design and light weight; only 40 kg.
- Dimensions of the product are 1705x1650x150 mm., and boxed: 1825x1805x195 mm.

AVIATOR

- Made from engineered polymer. PC-ABS, the same material used in the aerospace industry
- Clamp lock kit installation; no need to drill holes into the truck box and easy to remove and re-install (DIY)
- Light weight, only 35 kg.
- With electric control button, easy and convenient to raise and lower the lid
- 2-lock positions; able to lift the lid to a horizontal position
- Small installation kit - more extra storage space
- Strong and secure lock technique to protect your belongings
- Weather protection provided by high-quality rubber seals
- Improve fuel mileage, low profile, aero-dynamic design and light-weight
- Available in 2 textures: black leather grain and paintable in any colors

SPEED

- Made from engineered polymer. Polycarbonate-Acrylonitrile-Butadiene-Styrene (PC-ABS), the same material used in aerospace industry
- Clamp lock kit installation, no need to drill holes into the truck box
- Light weight, only 28 kg.
- Easy to remove and re-install (DIY), takes only few minutes
- Manual lift up with tough shock absorbers
- Small fitting kits, give you more storage space
- Strong and secure lock technique to protect your belongings
- Weather protection provided by high-quality rubber seals
- Improve fuel mileage, low profile and aero-dynamic design; lighter than other brands, improving fuel economy
- Available in 2 textures: black leather grain and paintable in any colors

AEROKLAS

Trinity

Gladiator

U-BOX

Distinguished by design & innovation

TRINITY

- Available: 2 models for Japanese trucks and American trucks
- Manufactured using high quality Medium-Density-Polyethylene (MDPE) which makes it incredibly tough, yet surprisingly light weight
- UV resistant material helps it look great for many years to come
- No drilling required with Aeroklas patented installation system
- Easy to install and remove, opens up to 90 degrees
- "Stay Open" featured to prevent accidental lid closure
- Safety with high quality locking system
- Can be installed to vehicles with or without roll bars

Aeroklas Trinity comes in 2 sizes:

J size for Japanese truck

210 L	21 kg.	(W610xL1460xH530) mm.
-------	--------	-----------------------

A size for American truck

230 L	24 kg.	(W610xL1570xH590) mm.
-------	--------	-----------------------

GLADIATOR

- Manufactured using high quality Medium-Density-Polyethylene (MDPE) which makes it incredibly tough, yet surprisingly light weight
- UV resistant material helps it look great for many years to come
- No drilling required
- Can be opened up to 90 degrees with 2 removable trays to store small items
- "Stay Open" featured to prevent accidental lid closure
- Safety with a high quality locking system
- Easily installed and removed for more storage space
- Can be installed to vehicles with or without roll bars

Aeroklas Gladiator comes in 3 sizes:

Size M	
165 L	(W580xL1350xH475) mm.
Size L	
200 L	(W580xL1419xH538) mm.
Size XL	
220 L	(W580xL1470xH540) mm.

M is for new L200/Triton; **L** and **XL** are for other models.

RAIL GUARD

To protect pickup rail lips

- Protect your bed and prevent the top of trunk's bed lips from being scratched or damaged
- Durable construction using ABS material, designed to last for years in any weather condition
- Simple to install with pre-applied 3M tape

GUARD FRAME

Secure & safe

- Made of ABS, tough and durable
- Easy to install
- Enhances the look of your pickup
- Helps to protect the protection bar
- With 3rd brake lamp function
- High quality plug and play wiring system

STYLING BAR

Variety of styles to chose from

- Manufactured using high-quality ABS, very light-weight and UV resistant
- Blow molding production process
- No drilling required with Aeroklas patented installation system
- With third brake lamp and easy to install
- Seal foam protects against scratches on rail lips
- Can be fitted with under rail liner or without bed liner
- Painted in 3 available colors (black, silver, white) and primer

CARGO LINER

More organized, more convenient,
cleaner

- Made from Thermoplastic-Polyolefin (TPO) high-quality material for all purposes
- High edges to protect your trunk from spills and messy conditions
- Designed to perfectly fit various car brands and models
- Resistant against acids and chemicals
- Easy to install, flexible light-weight material and easy to clean
- Fits a vast number of car models

THE STORY OF SUCCESS

"Aeroklas Co., Ltd is a member of the Eastern Polymer Group of Companies (EPG) and is recognized as a leading manufacturer of high-quality car and pickup truck accessories. Aeroklas is also acknowledged as an innovative leader in the production of various automotive plastic products with 20 years of experience. Aeroklas has now diversified to cover an even wider range of pickup truck accessories for both the domestic market as well as for the international market".
